

# **AWEA Wind Project O&M and Safety Seminar**

**January 15 - 16, 2014**

**Hotel Del Coronado | San Diego, California**

## **About the seminar**

AWEA is pleased to announce that CEO Tom Kiernan will be joining the AWEA Wind Project O&M and Safety Seminar. In addition to taking the stage during the Opening Session, Tom will be looking for your input on the challenges your company faces within the operations & maintenance and safety sectors. In addition to the two day seminar, AWEA Business Members can also make their mark by participating with industry experts during the pre-seminar AWEA Committee and Working Group meetings.

## **During the seminar, join:**

Engineers

Managers

Material suppliers

Occupational environment, health and safety professionals

Operators

Owners

Supervisors

Turbine manufactures

Wind technicians

... and discuss the best strategies to manage wind project assets, while fully understanding the environmental, health, and safety challenges workers face.

## **Choose sessions from two tracks**

Attendees in 2014 are now able to choose from two tracks at the event; the O&M track and Health, Safety, and Environment (HSE) track, allowing you to craft your ideal educational experience. The tracks will cover everything from drive train reliability and blade technology to rigging and standardization of training.

## **New product demonstrations**

AWEA has released two new resources to aid your company's operations, the AWEA Market Database Pro and the training module, AWEA Introduction to Safety: Wind Energy Industry. Both resources will have a hands-on demonstration during the seminar.

Check back for more details on the 2014 program.
