

Managing Safely for Offshore Renewables (IOSH)

This course provides managers and supervisors operating in the offshore renewable energy sector (wind, wave & tidal) with the essential tools for competently and safely leading teams.

This course is approved by the Institution of Occupational Safety and Health (IOSH), the world's largest health and safety membership organization, RTN (Renewable Training Network) and The Crown Estate.

CONTENT

- Understand the reasons for and benefits of managing safely.
- Understand the Manager's responsibilities and accountabilities for health and safety.
- Obtain a broad knowledge of the onshore based and maritime based health & safety legal duties relating to an offshore renewable project and know where to find help and guidance.
- Understand the structure and purpose of a health & safety management system.
- Have an appreciation of the hazards associated with offshore renewables at all stages of asset life, understand the process of how to assess the risks associated with those hazards and mitigate against them.
- Understand the purpose and features of an Emergency Response plan.
- Be aware of the steps necessary to undertake an effective accident and incident investigation and the reasons for doing so.
- Recognise the reactive and proactive elements of health & safety performance management and the advantages of collecting the correct Key Performance Indicators.
- Understand the reasons for effective Environmental Management and the features of an Environmental Management System and Environmental Management Plan.

OBJECTIVES

On completion, delegates will be able to:

- Ensure that health, safety and environmental requirements are appreciated by people employed as line managers.
- Review their own departmental systems, introducing new controls or implementing changes as appropriate to ensure safety in the workplace.

ADMISSION REQUIREMENTS

There are no formal admission requirements though the course is recommended for:

- Managers, Supervisors and Developers working in the offshore renewable energy sector.
- Anyone with responsibility for health and safety in the workplace.
- Individuals looking to enter the offshore renewable energy sector.
